Vice Admiral William F. Raborn, Jr. (Ret.)
Director of Central Intelligence
Central Intelligence Agency
McLean, Virginia

Dear Admiral Raborn,

The Washington Chapter of the National Classification Management Society will hold its monthly meeting on 11 May 1966 at Tom Ross' Charcoal Hearth, 2001 Wisconsin Avenue, N. W., Washington, D. C.

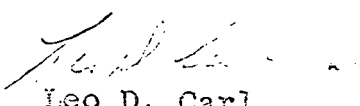

The guest speaker at this meeting will be Dr. John Ford, who is perhaps the nation's foremost authority on the subject of Soviet cybernetics. As you no doubt are aware, this subject now embraces, among other techniques, the application of PERT.

As the creator of the PERT cost management system, you may be interested in learning what the Soviet scientific community thinks of your most significant contribution to modern management techniques. Therefore, we are extending you an invitation to attend our Chapter meeting as an honored guest.

Cocktails will be served beginning at 1815 hours and dinner at 1915 hours. Dr. Ford will make his presentation at 2015 hours to be followed by a question-and-answer period.

We sincerely hope that you can find the time in what must be an extremely busy schedule to join us for what we anticipate to be a most enjoyable and profitable evening.

Sincerely,

Leo D. Carl
Chairman
